

ISCorr 3 WS (Corrosion Inhibitor)

ISCorr 3 WS is a water-soluble corrosion inhibitor used as an additive to drilling muds and foams, fresh- and salt water-based (up to full salinity). Adhering to metal surfaces, it protects them against corrosion in environments containing H₂S, CO₂ and O₂. The product is delivered in two versions, summer and winter, resistant to freezing down to -10°C.

Properties

Appearance	clear yellow liquid
Flash point	>61°C
pH	8-9
Solubility in water	total
Shelf life	3 years

Dosage

Typically, ISCorr 3 WS is added directly to the drilling fluid at a rate of 2.0 litres/m³. In a highly corrosive environment, it may be necessary to increase its concentration.

Packaging

ISCorr 3 WS is delivered in 200 liter drums or 1000 liter containers.
