

BDC 018 Retarder for Cement Slurries

BDC-018 is a cement slurry retarder designed to perform at high temperatures of up to 180°C. The product can be added to all types of oilwell cements.

Dosage

BDC-018 is most commonly used at a concentration ranging from 0.4% to 1.2% bwoc (by weight of cement), depending on the temperature and the quality of the cement.

Properties

Appearance	brown powder
	ok. 1320 kg/m ³
Bulk density	550-650 kg/m ³

Packaging

BDC-018 is supplied in 25 kg bags. The product should be stored in dry, covered areas, in its original, tightly sealed packaging.
