

BDC-031 Filtrate control additive

BDC-031 is a hydroxy ethyl cellulose polymer.

Application

BDC-031 provides filtrate control in slurries containing salt concentrations up to 18% by weight in the mix water with working temperature limit: up to 100°C.

BDC-031 also acts as a cement retarder at moderate temperatures.

Dosage

BDC-031 can be used in concentrations of 0.4% to 1.5% bwoc.

Properties

Physical form	off-white powder
Solubility	soluble in water
Ionicity	nonionic
Moisture content	max. 6%
Grade	300 mPa s
Range	400-700 mPa s

Packaging

25 kg multiply paper bags. BDC-031 must be stored inside at room temperatures.
